

## Matthew Slater Receives HGM Scholarship Award

Matt Slater, son of Bob and Patty Slater of Gulfport, Miss., and a 2007 graduate of Gulfport High School, is the recipient of the 2007 H. Gordon Myrick, Inc. Scholarship Award.

Matt was a proud member of the Gulfport High School Admiral Band his

*Matt Slater*

freshman and sophomore years, and was also a member of the Concert Band. In 2004, he attended the Gold Medal Classic Competition in Perkinston, Miss., where he scored

All Superior, 2nd Place and Best Percussion in his class. Matt enrolled in the co-op program his senior year.

Matt is a member of Bayou View Baptist Church and an active member of its youth program. He recently served with other members of the youth program on a mission trip to the Ukraine. The mission trip, leaving a lasting impact on Matt, has compelled him to continue to help others in need.

He will attend MGCCC-Jefferson Davis Campus this fall to pursue a degree in Criminal Justice, with hopes of one day becoming a field agent for the FBI.

Congratulations, Matt!

*New manufacturing facility for Soprema in Gulfport, Mississippi.*

## Soprema Construction Complete

In August 2007, HGM completed the new manufacturing facility for Soprema in Gulfport, Miss. Other than Mother Nature's normal distractions, construction went smoothly, the project completed earlier than expected and finished within budget.

HGM, Guild Hardy Architects and Soprema combined their efforts to develop a cost effective design that meets Soprema's needs. Our design-build construction approach saved considerable time and money. HGM extends its thanks to Soprema for the outstanding working relationship and new friendship.

Soprema is an industry leader in manufacturing SBS-engineered asphaltic roofing membranes and waterproofing products. For more information, visit their website at [www.soprema.com](http://www.soprema.com).

## Future Pipe Industries Expands Its Gulfport Facilities

HGM has completed design on an addition to Future Pipe Industries' Gulfport, Miss., facility. The addition will add approximately 28,000 square feet of production area to FPI's original 130,000-square-foot production facility.

Future Pipe is a global leader and innovator in the manufacturing and technology development of fiberglass pipe systems. HGM completed Future Pipe's original Gulfport facility in August 2005, and considers it a great measure of success to be working with FPI on another project.

We don't just want to build your building; we want to be your contractor.

# Google Search Tips To Make Your Life Easier

If you want to get the most out of your Google searches, the Small Business Hub website offers these tips to refine your searches:

- If you want to look for a phrase such as *employee communications*, you might be better off doing a search explicitly for the phrase by enclosing the words in double quote marks like this: "employee communications."
- If you want to exclude a word from your search, use a "-" sign in front of the word. For instance, if you wanted to search for *inspirational*, but wanted to exclude the word *religious*, you would search for *inspirational-religion*.
- If you want to search for a phrase or term on a specific site, you can do it this way: Type the phrase you are looking for followed by *site:www.sitename.com*. For example, "bathing suits" *site:shop.com*.
- Want to look up the number of someone who called you? Enter it this way: *phonebook:617-555-1212*.
- If you want to know where the area code of a phone number is located, just enter the three number area code. Example: *617*.
- If you need to calculate something, you can enter the expression into Google. For instance, *4\*8*, then hit "Enter" for the answer.
- If you need the definition of a word, enter *define:someword*.

## It's All About Attitude

As a manager, it is important to project the correct attitude to those who spend their days working for and with you. Here are some sage words from Napoleon Hill in *The Law of Success in Sixteen Lessons*:

"Until you have learned to be tolerant with those who do not always agree with you—until you have cultivated the habit of saying some kind word of those whom you do not admire—until you have formed the habit of looking for the good instead of the bad there is in others, you will be neither successful nor happy."

## Chocolate For Brains

Consumption of a cocoa drink rich in flavanols—a substance found in dark chocolate—gives the brain a boost of blood flow for two to three hours, a University of Nottingham study has found.

The increased blood flow could enhance performance, lead researcher Ian McDonald, professor of metabolic physiology, says. It can also improve general alertness. The study raises the possibility that ingredients of chocolate could be used to treat vascular impairment, such as strokes or dementia, and for maintaining vascular health.

The study also points to possibly using cocoa flavanols to enhance brain func-

tion when people suffer fatigue, sleep deprivation and the effects of aging. McDonald emphasized that the level of cocoa-rich flavanol beverage was specifically designed for the study and not available commercially.

Flavanols are also found in red wine, green tea and blueberries.

## Sit Up Straight!

Here are the Department of Labor's Occupational Safety & Health Administration's general recommendations for setting up a safe and comfortable computer workstation when it comes to your posture:

- The top of your monitors should be at or just below eye level.
- Your head and neck should be balanced and in line with your torso.
- Your shoulders should be relaxed.
- Your elbows should be held close to the body and be supported.
- Your wrists and hands should be in line with your forearms when they are on the keyboard.
- You should have adequate room for your keyboard and mouse.
- Your feet should be flat on the floor.

## Trivial Pursuit

- 1) A person generally earns a JD degree in order to work in what field?
  - a) medicine
  - b) accounting
  - c) religion
  - d) law
- 2) Advertising icon Mr. Peanut wears all of the following, except:
  - a) gloves
  - b) bow tie
  - c) monocle
  - d) top hat
- 3) What female superhero wields a magic lasso?
  - a) Batgirl
  - b) Elektra
  - c) Wonder Woman
  - d) Hawkgirl
- 4) What is the only Great Lake that is not bordered by the state of Michigan?
  - a) Erie
  - b) Huron
  - c) Ontario
  - d) Superior

Answers: 1) d 2) b 3) c (When caught in the lasso, one is compelled to tell the truth.) 4) c

## Improving Your Balance

Having good balance is part of overall health. Paige Waehner, fitness expert and author of *Guide to Be a Personal Trainer*, ranks it right up there with flexibility, core strength and mobility. Good balance can prevent a host of injuries and make it easier to do routine tasks and activities like hang curtains, paint a room, hike or bike. To improve your balance, try these three simple routines:

- 1) For a week, get dressed and undressed without sitting or leaning on anything.
- 2) When standing in line, try to balance on one leg for as long as you can.
- 3) Walk with a book on your head. This will improve balance and posture.

## The New Middle Age

According to a recent ACNielsen survey, 70% of those 45 and older agree that the 60s are the new middle age. Almost everyone, it seems, is willing to turn back the clock. This, researchers believe, is due to several factors—plastic surgery can make people look younger longer, people are living longer and we are taking longer to grow up and become adults.

“We are living much longer than previous generations, significantly increasing the number of years we are old relative to the years we are young. Or it may just be that we are—at least in our minds if not our bodies—staying young for longer. It could be argued that we are taking longer to ‘grow up,’ staying on longer in further education and often remaining in the parental home into our mid-20s,” says David McCallum, Managing Director (Global) of ACNielsen Customized Research.

“The goalposts have moved. Our perspective on

what constitutes a ‘young adult,’ ‘old’ or ‘middle-aged’ and the lifestyle and behavior appropriate to each of these phases in our lives has changed accordingly. Stereotypes are being broken, requiring manufacturers to find new ways to communicate, and connect with, their target consumers.”

But while respondents may have been influenced by the results of plastic surgery, an overwhelming 80% said they would not consider cosmetic surgery when they get older.

## A Sticky Situation

Do the buttons on your phone, calculator or remote stick? If so, try dabbing on a little industrial lubricant—such as WD-40—with a cotton swab. For regular maintenance and to prevent the buttons from re-sticking, electronics experts advise wiping down equipment with a soft damp cloth every month. Don't use chemicals or cleaners because these could damage the exterior surface, and the spray varieties in particular could leak into the equipment and damage the electronics.

## Sherlock Bones

A man wanted to get a pet because he was lonely and was perusing the classified ads in the newspaper when he read this: Purebred Police Dog For Sale: \$50. The man thought this price was a bargain and he figured the dog would be intelligent and good looking since it was a purebred. So he picked up the phone and told the seller he wanted to buy the dog. The seller offered to deliver the man's new pet to his home. The man was delighted.

When the police dog arrived, however, the man was taken aback by the way it looked. It was definitely not the good-looking dog he had pictured in his mind. Instead, the dog looked like nothing more than a mangy mongrel.

“How in the world can you get away with calling that dog a purebred police dog?” the man asked.

The seller answered: “Don't let his looks deceive you. He's working undercover.”

# Lynn Meadows Discovery Center Performing Arts Center

We are very fortunate at H. Gordon Myrick, Inc. to be in the position to help our friends again at the Lynn Meadows Discovery Center. HGM has begun construction on a new phase at the Discovery Center for the WINGS Performing Arts and Education Center. It has been in planning a long time, but was sidelined, in part, due to Hurricane Katrina.

“The Center is the result of the continued efforts of LMDC to provide a state-of-the-art, fully supported performing arts center for our children and youth.”

Financial support for the new facility has been achieved through the continuing fundraising support of Emeril and Alden Lagassee, a grant from the State of Mississippi, and continued support by the local community. This phase of the construction involves the completion of the two-story support facility for the performing arts lobby, offices, multi-purpose classrooms, restrooms and a brand new café with a first-rate kitchen all dressed out with equipment from Emeril’s good friends at Viking.

The Center is the result of the continued efforts of LMDC to provide a state-of-the-art, fully supported performing arts center for our children and youth. LMDC is listed as one of the top 50 children’s museums in the United States.

As always, we are very excited to be a part of the ongoing growth at the Discovery Center. We take great pride in being involved in this exceptional center that strives to provide top class facilities, programs and support for our children.

*Because our children should grow up in a world as beautiful as they are... this is why HGM Invests in the Children of our Community.*

# Mississippi City UMC Restoration and Renovation Project

The Mississippi City United Methodist Church Building Committee has selected H. Gordon Myrick, Inc. to complete the restoration and renovations of its church facilities. Mississippi City, the church’s namesake, is a historic area of Gulfport and is located in close proximity to the Gulf of Mexico. The church will receive a complete makeover as a result of the extensive damage from the high winds and storm surge of Hurricane Katrina. The makeover will also include an addition to accommodate their children’s school program.

It is a pleasure working with the Reverend Rod Dickson-Rishel and the Church Building Committee.

The project is HGM’s third Methodist Church restoration project since Hurricane Katrina. We take pride in helping each church, as we support the growth of His Kingdom.
